How do i recover my bookmarks and google search history. How do i find my bookmarks and history.

Desktop Chrome: More menu > Settings > Sync and Google services > Manage what you sync > Customize sync and toggle on Bookmarks. Chrome app: Tap three-dot menu > Settings > Sync and Google Services > Manage Sync and toggle on Bookmarks. This article explains how to sync Chrome browser bookmarks on a computer or in the Chrome mobile app for iOS and Android devices. Additional information on adding a passphrase to protect your data and on troubleshooting is included. When you sign in to your Google account on one device, you can sync your Chrome bookmarks across all of your devices. All you have to do is log in using the same Gmail address. The default setting includes syncing bookmarks. If you turned that off, turn it back on using Chrome on the desktop or on your mobile device. To sync your bookmarks on a desktop computer: Open the Chrome browser on your computer. In the upper-right corner, click the More menu (three vertical dots) and select Settings. Click Sync and Google Services. Select Manage what
