## Urodynamic Testing

- A group of procedures that evaluate how well the bladder, sphincters, and urethra are storing and releasing urine. Most urodynamic tests focus on the bladder's ability to hold urine and empty steadily and completely. Urodynamic tests can also show whether the bladder is having involuntary contractions that cause urine leakage.
- Urodynamic tests may be recommended if symptoms suggest problems with the lower urinary tract. Lower urinary tract symptoms (LUTS) include
  - urine leakage
  - frequent urination
  - painful urination
  - sudden, strong urges to urinate
  - problems starting a urine stream
  - problems emptying the bladder completely
  - recurrent urinary tract infections
